

Microdermabrasion from Rocky Mountain Academy of Hair, Skin & Nails

\$40 Value

Microdermabrasion, also known as microderm, is one of the easiest and most effective anti-aging treatments you can get. Its benefits are many: softens fine lines and wrinkles, helps to smooth coarsely textured skin, decreases the appearance of scarring, decreases pore size, and reduces superficial hyper-pigmentation, also known as age spots.

Microdermabrasion also makes it easier for high-tech skin care products to penetrate into the deeper layers of the skin and help build collagen, which gives skin its youthful appearance.
